Introduction

Acting in the capacity of Fiscal Agent for the United States Treasury Department, designated Federal Reserve Banks issue promotional Savings Bonds for organizations and financial institutions. There are no fees or charges associated with this service.

This reference guide is for financial institutions and organizations that are interested in issuing promotional savings bonds. It provides specific promotional bond procedures for arranging the issuance of bonds through their servicing Federal Reserve Bank. This guide is not intended to be a substitute for official Treasury regulations.

Public information brochures on bonds are available from the Bureau of the Public Debt, Savings Bonds Marketing Office.

Information on interest rates, yields, and savings bond servicing transactions is not included in this guide but is readily available in the latest revision or amendment of the appropriate Treasury Circular. Circulars and related information are available from your servicing Federal Reserve Bank.

The Promotional Bond Issuing Service Works As Follows:

Your organization contacts your servicing Federal Reserve Bank to establish a promotional bond account and to receive company and location identification numbers. All forms and documentation required for purchasing promotional bonds will be sent to your organization free of charge.

Your servicing FRB can provide a free PC-based software application (PSWIN) for use in submitting bond issue information (please refer to page 3 of this guide for further details) or you may develop your own software for use in providing bond issue information. Bond issue information may be submitted electronically, on tape, cartridge or diskette. Specifications for compiling this file are contained in appendix A & B.

Your organization sends the order information with payment to your servicing Federal Reserve Bank for issuance of the bonds. Payment and order information must be received on or before the last business day of the month in which issue is requested in order to obtain bonds with the current month's issue date. Please contact your servicing Federal Reserve Bank to find out how deadlines affect the Bank's receipt of your payment as well as the bond issue date. Bonds can be bulk mailed to an organization for distribution, or mailed directly to the owners.

Series ■ Denominations ■ Registrations

Series Available

Two series of savings bonds are available for purchase for promotional activities — EE and I.

Denominations Available

Savings bonds can be purchased for promotional activities in the denominations and at the purchase prices shown below.

Series EE

5,000.00	2,500.00	5,000.00	5,000.00
10,000.00	5,000.00	10,000.00	10,000.00

Authorized Registrations

Savings bonds are registered in the names of individuals in one of three ways: single ownership, coownership, or beneficiary form.

Single Ownership

(One owner only)

Only the registered owner may redeem the bond.

At the death of the owner, the bond becomes the property of the bondowner's estate.

Coownership

(Two persons as coowners)

Designated by OR

Either may cash the bond without the knowledge or approval of the other. At the death of one coowner, the surviving coowner becomes the sole owner of the bond.

Beneficiary

(One owner and one beneficiary)

Designated by POD (Payable on Death)

The bond is redeemable only at the request of the registered owner. The beneficiary becomes the sole owner of the bond at the death of the owner.

No more than two registrant names can appear on a bond. Promotional savings bonds can be inscribed using a "mail to" feature which simply facilitates delivery to someone other than the owner. If the bond is inscribed with the words "mail to", the "mail to" designee has no ownership or beneficiary rights to the bond.

Owners or first-named coowners must provide a Social Security Number. They should be U.S. citizens, non-citizen residents of the U.S., residents of Canada and Mexico working in the U.S., or non-citizen employees of U.S. organizations abroad. Minors can be named as owners, coowners or beneficiaries.

Submitting Bond Issue Information

Automated input provides a high level of control and quick turnaround time for receipt of bonds. Your organization establishes and maintains a database file containing the savings bond registration information for each recipient of a promotional bond. Bond issue information is provided through the use of a magnetic tape, cartridge or diskette. If you plan to develop or use existing software to provide automated media, the file specifications contained in Appendixes A and B should be used in formatting the media.

The Promotional Bond for Windows System (PBWIN) is a PC based software application developed by the Federal Reserve Bank specifically for use by organizations in submitting bond issue information. This user friendly software package allows you to maintain a promotional savings bond database at your office. The software can be installed on any PC with Windows 3.x version or higher. There is no charge for the software and it offers several advantages over developing your own software. The use of the software saves time and detects errors. Direct access to your own database permits updating of information at your convenience.

Testing and Labeling

Your servicing Federal Reserve Bank will provide you with company and location identification numbers for the purpose of submitting test and subsequent production data. An external label should be affixed to the test tape, cartridge, or diskette and

should contain your organization name, mailing address and company and location identification numbers. A file name should also appear on the label, if applicable. In addition, records of the number of bonds for each denomination by series (EE or I), total number of bonds and total purchase price of the bonds contained in the test file should be provided.

Please include, with the test media, your organization name, telephone number and the name of the person who should be contacted relative to the test results.

The test results will be provided as soon as possible, and if successful, arrangements will be made for the submission of production data. If the test is not successful, a second test may be required. After successful testing of automated input, the appropriate forms and instructions will be provided.

Submitting Production Data

All automated media sent to your servicing Federal Reserve Bank should contain an external label which provides your assigned company and location identification numbers, organization name and mailing address. A file name should also appear on the label, if applicable.

When submitting automated production data, be sure to include the appropriate order summary for each series (EE, I) and payment for the purchase price of the bonds. Information on how to complete an order summary is shown in Appendix C.

Payment Methods

Acceptable Methods of Payment

Payment for promotional bonds can be made through an Automated Clearing House (ACH) arrangement, a charge to the reserve/correspondent account of a designated depository financial institution, by funds transfer or check. Your total payment must agree with the total purchase price of the savings bonds to be issued.

The ACH payment method

The most widely accepted method of paying for promotional savings bonds is through an ACH arrangement. Direct Deposit (ACH credit) is safe and confidential. Direct Payment (ACH deposit) is convenient and reliable. We encourage the use of the ACH method since it is the most efficient payment method. To use the ACH debit arrangement, your organization will complete and submit an ACH agreement form.

Charging a reserve/correspondent account

An arrangement can be established with a depository financial institution to permit your servicing Federal Reserve Bank to charge a reserve/correspondent account in payment of bonds. A letter of authorization from the depository financial institution is required.

Funds transfer

Your servicing Federal Reserve Bank can also receive payment using the funds transfer network. The name of your organization, including your company and

location identification numbers, and a reference to promotional savings bonds should be included in the funds transfer message. An arrangement can be established with a depository financial institution for this purpose. Instructions can be obtained from your servicing Federal Reserve Bank.

By check

If your organization chooses to make payment by check, the check should be made payable to your servicing Federal Reserve Bank.

Payment Submission Requirements

Full payment for promotional bonds must be received by your servicing Federal Reserve Bank on or before the last business day of the month in which the bonds are issue dated. When using the ACH method of payment, it is important to note that your order summary is due on or before the business day preceding the last business day of the month even though the “effective date” for the ACH charge is the last business day of the month. Please contact your servicing Federal Reserve Bank to find out how processing deadlines affect the Bank’s receipt of your payment as well as the bond issue date. The issue month is extremely important to bondowners since interest begins accruing on the first day of the month of issue.

Issues ■ Replacements ■ Corrections

Printing and Delivery

Bonds are issued and mailed within fifteen business days from the date of receipt of an order summary, automated media and payment.

However, incomplete information and/or edit problems associated with automated media may delay processing. Bonds can be delivered in bulk to the organization for distribution or mailed directly to the bondowner. An explanation of the information shown on the face of a United States Savings Bond can be found in Appendix D.

Undeliverable bonds returned from the United States Postal Service will be forwarded by your servicing Federal Reserve Bank to your organization for presentation to the owner. **It is extremely important that organizations take action to ensure that complete, up-to-date and accurate bondowner addresses are furnished to your servicing Federal Reserve Bank.**

Record of Bonds Issued

After bonds are issued, your organization has the option to receive a record which summarizes the information printed on each bond. The information provided on this record is shown below:

- Bondowner's name and Social Security Number
- Bond print date, issue date and serial number
- Bond denomination
- Series (EE or I)

A record of bonds issued can be provided in **one** of the following formats: computer printout, magnetic tape, cartridge, diskette or microfiche. Generally, organizations receive output information in the same media type used to submit promotional bond inscription information. The file specifications for output information are contained in Appendix E.

The bond issue information will assist you in providing owners with a description of bonds purchased. Organizations should use this information to handle all inquiries on bonds.

Replacements

Inquiries concerning nonreceipt of bonds should not be made until thirty calendar days after the savings bond print date. This period allows for United States Postal Service delivery and return of undeliverable bonds.

Detailed information should be supplied in order for your organization to submit a claim of nonreceipt of a savings bond on behalf of the owner. A description of the bond(s) can be obtained from your output information and used to complete Part I of form PD F 3062. The form should be completed and signed in accordance with the instructions provided on the form and submitted to your servicing Federal Reserve Bank. In the event you cannot determine the description of the bond(s), your servicing Federal Reserve Bank can provide it.

Corrections

Bonds inscribed with errors in the owner's, coowner's and/or beneficiary's name may be returned to your servicing Federal Reserve Bank for correction with form FA 400. Generally, form FA 400 is used to correct errors due to the submission of incorrect bond issue information by an organization. If the bondowner desires reissue to change ownership information, additional requirements apply. Bonds inscribed with minor errors, e.g., misspelled addresses, incorrect Social Security Numbers, should not be returned for correction.

Bonds inscribed with incorrect Social Security Numbers should be reported to the Bureau of the Public Debt or your servicing Federal Reserve Bank. Bonds containing incorrect Social Security Numbers will not be reissued but ownership information will be corrected on the records of the Bureau. When furnishing information to correct Social Security Numbers, please include the bond serial number, issue date, Series (EE or I) and the registration shown on the face of the bonds.
